

## Non-Transdermal Sleep Patch

(Nothing enters the body!)  
**SAFE!** No drugs, sedatives or stimulants.

The **RestQuiet** patch utilises the **LifeWave** technology. The materials in the patches consist of a patent pending blend of water, stabilised oxygen and amino acids. We believe the patches work by increasing oxygen uptake in the body. It is a well known fact that elevated levels of oxygen promote a restful nights sleep.

The **LifeWave** technology in **RestQuiet** communicates with the body through the human magnetic field. This is known as frequency modulation and resonant energy transfer.

The **RestQuiet** patch system is the newest product of modern science applied to ancient oriental medicine that induces you into a deep rest by means of a persistent stimulation of the bodies own natural acupuncture meridians.

Place a patch on the right temple.

*Note: Apply only one (1) patch per application/night. Try alternative positions as illustrated, to find which works best for you.*

Place a patch on the inside of the foot near the ankle bone by the heel.

### Testimonials

The PATCH is wonderful... Not only does it insure you a restful nights sleep, without the snorts that can wake you up, but it enables couples to sleep together. ...my husband and I now sleep peacefully side by side without aggravation. Much nicer on a cold night to cuddle, than to throw on another blanket.

**S.B.Banning**, California

My sleep apnoea was discovered in the mid 90's by a sleep test. The diagnosis was a 50% loss of oxygen while sleeping. ...Prior to the RestQuiet sleep patch, I went to bed sleepy but laid awake prior to sleeping. Now I go to bed when I am sleepy and wake refreshed...

**W.J.L.**, San Diego, California

I bought several packages of the sleep patches. Both my mum and I are having amazing results with them. She is sleeping through the whole night or the first time in years, as I am. Thank you.

**S.S**

I tried your sleep patch at the advice of a friend... I am very sceptical by nature and really didn't expect much... but WOW! I woke up the next morning feeling better than I have in years.

I think a large part of the positive effect is the patches ability to greatly reduce congestion, allowing a person to breath easy and get the necessary oxygen flow. I was diagnosed with sleep apnoea and had considered surgery. All that is now on hold... I use them every night now.

**D.M.**, Atlanta, Georgia

**What should you feel when wearing the RestQuiet Patch?**  
 You probably will feel nothing. The RestQuiet Patch is not a stimulant nor a depressant like caffeine or alcohol. What you should notice is a very constant and stable levels of deep sleep during the night.
